

EPT Barrier Wine-Pac™

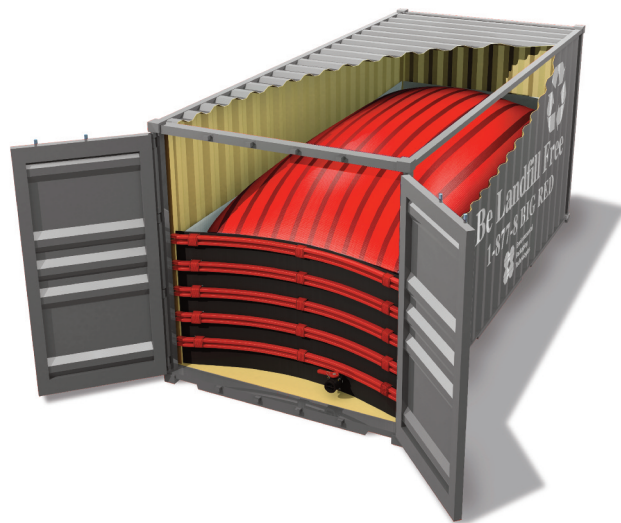

The best flexitank solution for bulk wine packaging.

Reclaim Reduce Recycle

EPT's Barrier Wine-Pac™ is customized to meet the specific requirements of the wine industry. Includes *Dual Layer Barrier Technology* and performance features only available in BIG Red Flexitanks™.

Unique Barrier Wine-Pac Construction

- Dual tubular layers comprised entirely of food grade barrier film. Combined layers achieve an OTR rating of <0.0003cc/100in²/day Max.
- Incorporates 'strength bands' woven into the outer polypropylene sleeve to stabilize liquid dynamics
- Compression fitted flange with new anti-suction design for ease of unloading and maximum discharge
- Made in the U.S.A. to strict ISO 9001:2008 standards
- Meets all Container Owners Association Code of Practice requirements for flexitanks

Optional Product Protection

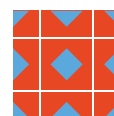

Also available for each Wine-Pac is EPT's extremely durable, WearSleeve™ that protects the bottom and sides of the flexitank. An integrated snout encloses the valve after filling to protect it from odor or vapor migration and adds a feature of tamper protection.

EPT Service

EPT offers an extensive global network of associates to supply, fit, service and unload our Wine-Pac. EPT's flexitanks are only installed by certified personnel, ensuring that your wine reaches its destination safely and securely. EPT also offers an efficient Delivery Coordination Program to assist volume customers with unloading, removal and recycling.

No other flexitank can protect your wine cargo like the BIG Red Barrier

We stand behind our products with \$15 million in Liability and Pollution Insurance.
